## REPORTING & DASHBOARDS

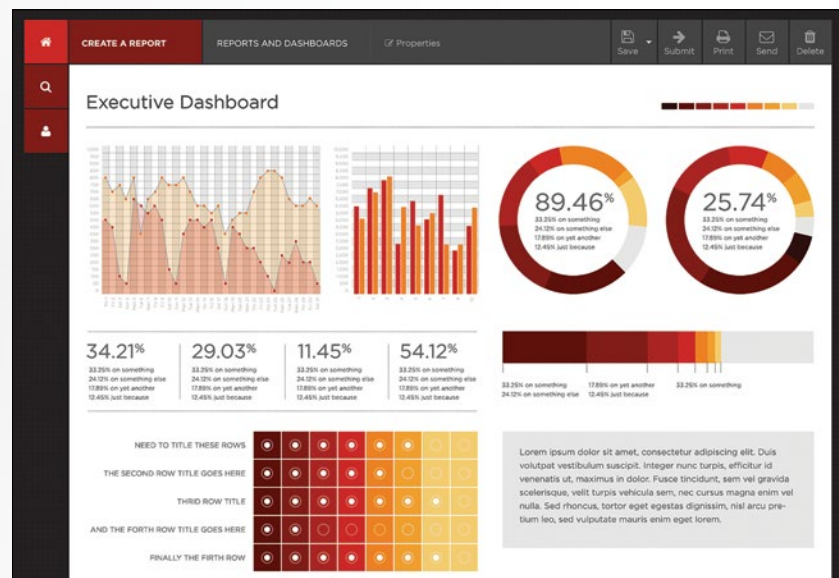

### GAIN VALUABLE INSIGHT INTO YOUR OPERATIONS

- Incident/Accident
- Safety Meetings
- Fuel Tracking/Deliveries
- Inspections
- Audits
- Surveys
- Inventory
- Asset Management
- Trucking Tickets
- Compliance
- Toolbox Talks
- Checklists
- **AND MORE**

The ability to easily create customizable reports from the information collected in B2W Inform is essential for making smarter and more informed business decisions both in the field and office. Reports and dashboards help companies track internal business trends and processes, improving inefficiencies throughout your operations and departments. Streamlining these increases job profitability and creates more transparent processes overall.

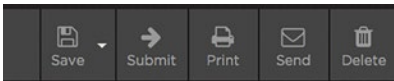

### Customizable Reporting and Dashboards

B2W Inform offers robust reporting options. The reporting module allows you to create any type of report or dashboard without any technical support or knowledge. This means you have true ad hoc reporting at your fingertips, whether it's on your laptop or mobile device. Use any of your data collected in B2W Inform to build reports in minutes, and increase analytic coverage across your operations.

SOFTWARE

## SCHEDULE REPORTS

Reports can be scheduled to run automatically based on parameters such as time periods, recipients, and recurrence. You can set them to be emailed or archived when setting the scheduled report. This way, when you login to B2W Inform or your email, your report is ready for you to review, saving you time to make critical business decisions.

## ABOUT

Founded in 1993, B2W Software (formerly BID2WIN Software) is a provider of enterprise-class construction solutions for the heavy construction industry. For more information, visit [www.b2wsoftware.com](http://www.b2wsoftware.com) or contact B2W Software Sales at (800) 336-3808.

ENTERPRISE-CLASS CONSTRUCTION SOLUTIONS

## Reporting & Dashboard Features

- **Express Reports**

With express reports, you can build basic tabular reports.

- **Standard Reports**

With standard reports, you can build reports with a similar feel to Excel; pairing grids with additional functionality including maps, charts, formula editors, and conditional formatting.

- **Crosstab Reports**

With crosstab reports, you can create complex tables showing summary information in a number of options.

- **Dashboards**

Create and save default dashboards on your reports home page. Whenever you login to B2W Inform these dashboards automatically update, ensuring the most up-to-date information. Build charts, maps, hyperlinks, images, and more by drilling down into each dashboard.

- **Link Your Reports and Execute Drilldowns**

With the ability to link an unlimited number of reports and charts, you can keep drilling down to better understand your data.

- **Charts, Graphs, and Geographical Maps**

With these features, you are able to choose from a wide variety of animated visuals as well as set up maps that show your data in five different dimensions!

- **Custom Formulas**

With the ability to use custom pre-defined formulas you can input formulas directly into cells in order to discover crucial business information.

- **Export Reports**

Export to various file formats: PDF, RTF, Excel, HTML, CSV.

## THE B2W SOFTWARE ADVANTAGE

Designed and built on the ONE (Operational Networked Elements) platform, B2W is the first and only suite of construction management solutions that puts everyone in your company—from managers in the office to foremen in the field—on the same page at the same time. Separately or as one unified suite, B2W Estimate (estimating & bidding), B2W Track (field tracking & analysis), B2W Dispatch (resource management & dispatching) and B2W Maintain (equipment maintenance & repair management) offer:

- Increased operational efficiencies and accuracy for more profitable jobs
- One operational database for single point data entry that enables instant cross module resource visibility and collaboration
- Operational control through real-time dashboards with easy drill downs
- Comprehensive integration with all major accounting software packages
- Advanced capabilities between the field and the office via tablet application
- Intuitive user interface for streamlined estimating, bidding, logistics, field operations and maintenance
